---

Hi Nancy,

Happy Monday! I have a customer who has a 250 cage tank with a two-way valve; they are selling it and not refilling it and it won't be returned to them, are they required to equip it with a one-way or would that be up to the purchaser?

This guy had someone from the state out last week doing inspection and wasn't able to get an answer from him so I'm hoping you can help!

Thanks!
